1. In the vicinity of Prague, halfway between Modrany and Libus and on the right of the road about two kilometers from Odrany, seven bunkers have been built about 20 m. from the road in a place called Na Kamejku. The bunkers are 5 x 5 m. in size. They are built underground, only their tops protruding above the ground by about 20 cm. The ground is kept camouflaged with green pine branches. The bunkers are connected by trenches and trenches also lead from the bunkers to a nearby grove of trees in the direction of Prague. These bunkers are situated about 30 or 35 meters from each other. They were finished in May 1952, but the surrounding ground is still being adapted.
2. Similar bunkers are being built near Slivenec, in the vicinity of Ruzyne and Kbely. Beyond these bunkers there are trenches for A/A batteries, located about 10 km. beyond the defense system of the bunkers. One can see only the barrels of the A/A guns; their caliber is estimated as no larger than 37 mm.
3. A powerful field radio station was observed near the A/A guns.
4. Soldiers serving in the bunkers live in the nearby woods. Civilians (including foresters) are strictly forbidden to enter the woods.
